

SG 7600 Metropole 23mm in Black

Our preference for black window frames and interior fittings continues to increase.

To reflect this ongoing trend, we are pleased to extend our Metropole colour palette to include the elegant SG 7600 23mm pole system in black, complete with black two-component (2C) gliders. This means that all our Metropole systems are now available in **black**.

This addition is already included in our price list and the latest edition of our Metropole brochure.

Images are available from our online image bank (password required), for access to these and our wide range of photography to support your marketing needs please email samshervill@silentgliss.co.uk.
